JTEHSxx HEATSHRINK TUBING

The JTEHSxx is a range of black heatshrink tubing for insulating wires and small components in low voltage systems. It shrinks with a ratio of approximately 2:1 of the original pre-shrunk size.

We stock the following heatshrink packs:

MODEL	NOMINAL DIAMETER	PRE-SHRUNK DIAMETER	LENGTH	QTY IN PACK
JTEHS01	1mm	1.5mm	90mm	10
JTEHS02	2mm	2.5mm	90mm	10
JTEHS03	3mm	3.5mm	90mm	10
JTEHS123	This is a sample pack of the above 1mm, 2mm and 3mm sizes. It comes as 3 of each size heatshrink tubing in the pack, 9 lengths in total.			9

Please note: The lengths of tubing may come flattened or slightly twisted in places, but this does not affect usage or the way it shrinks. It's just due to the how product is stored and shipped.

This document is updated from time to time as new information becomes available – usually due to people asking relevant questions regarding usage or configuration. The “Document Updated” date in the bottom-right corner of each page shows what document date you have. The latest version of this datasheet document can be downloaded from <http://www.jtelectronics.co.nz/products/documents/> or Google “JTEHSxx”
